

INSTRUCTIONS FOR USING BM TECH AUTOMOTIVE KEY DROP AND PICK UP SAFES

If you plan to drop your vehicle off after business hours you will need to drop your vehicle key into the key drop safe.

This is located at the right hand side of our main front doors. (See Arrow)

Dropping off a vehicle

Please ensure your car is parked in a bay marked for BM Tech parking.

Please ensure you have locked your vehicle and removed any items you require.

Please only leave us with car key and other keys you do not need to use.

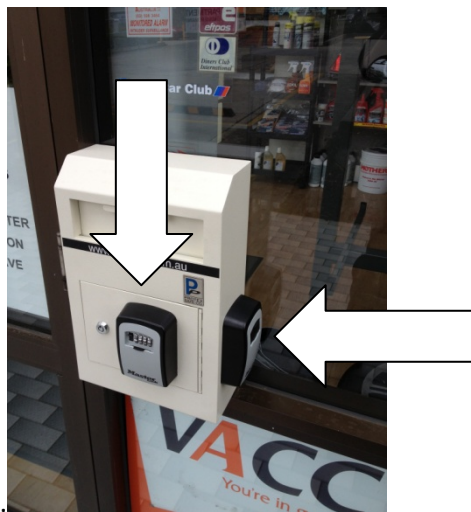

Pull open flap at top of key safe and place keys in opening. Close flap and then reopen to ensure keys have dropped.

If picking your vehicle up after hours

Your keys will be in the “Master Lock” key safe mounted on the key drop box.

You will have been instructed to use the front or the side master lock key safe.

Push down to open the black combination cover and reveal the combination wheels and opening lever.

Put in your combination from left to right in the front centre row in line with the white line.

Push down on the opening lever next to the numbered wheels to open the master lock key safe.

Remove your key and close the master lock.

If you had excessive keys they may have been removed from your key ring and placed in your vehicle glove box.

Close the lock door after you have removed your keys.

If you are leaving our Courtesy Car, please drop the keys into the key drop slot on the key drop box once you have removed all of your items and locked our vehicle.

Thank You.

In an Emergency please call Martin on 0419 560 432.
